

# SERVERS, WORKSTATIONS & HARDWARE

## What is a server?

Hardware or software designed to provide network services such as disk storage and file transfer to clients.

## What is a workstation?

A computer connected to a network. Users (clients) interact with software and resources on the server.

## We supply, configure and maintain high performance servers, workstations and a wide range of IT equipment.

When building servers and workstations we keep their purpose in mind. Our advice is led by the notion that **what you don't need is just as important as what you do.**

With **advanced configuration** and **quality hardware** it's possible to limit the risk of potential problems from the outset.

**Performance, stability and upgradability come as standard with our servers and PCs**

## First-class support...

Every minute your **IT equipment** isn't operational your company loses money.

With reliable support from **Adept Systems** you'll be free to **concentrate on your business** rather than your IT systems.

To **protect the environment** all IT equipment is disposed of in accordance with the **WEEE Directive**.

## Printers, components, upgrades etc:

We offer **competitive pricing** and **superior service**. Whatever you require, from an extra printer to more memory, we can help.

## Windows Server specialists:

Features include **faxing from the desktop**, **proxy server** for internet access, **e-mail server**, **file and printer sharing** and **secure dial in** for remote/offsite workers.

Our engineers are experts in configuring **Windows Server** and related technologies.

## KEY BENEFITS:

- ✓ **Upgradable** servers & workstations to **increase hardware life**
- ✓ **Full support** from experienced engineers
- ✓ **Low pricing** from official partners - Dell, Avaya, Fujitsu-Siemens etc.
- ✓ **Windows Server** specialists

**GET IN TOUCH** for quality IT hardware at competitive prices with excellent after sales support...
