# ⬃ IT AUDITS & HEALTHCHECKS

? What is an **IT audit?**

An analysis of your IT infrastructure and systems to examine the effectiveness of their controls to minimise risks.

Secure your network and prevent unauthorised access - protect your business and client data today.

Our **comprehensive IT audit** service covers each device in your network infrastructure. The audit highlights **weaknesses** across your network and **common configuration faults** with **hardware and software.**

Issues you have encountered in the past are analysed and the current state of all your systems is evaluated.

Our engineers pinpoint IT infrastructure issues before they affect your businesses efficiency

What's included with each IT audit?

A **detailed breakdown** of your current network infrastructure with independent advice on **maximising reliability, performance** and **security.**

Our experience has given us a deep insight into **best practice techniques** to keep your network **optimised** and **running smoothly.**

If your server or IT equipment is operating slower than usual, our IT audits will quickly reveal the cause.

SECURITY ▸▸
PERFORMANCE ▸▸
OPTIMISATION ▸▸

All areas of your IT infrastructure are examined...

NETWORK ASSETS EXAMINED:

- Servers & workstations
- Printers
- E-mail
- Backup systems
- Operating system components
- Anti-virus & security

KEY BENEFITS:

✓ **Identifies unlicensed software** and potential compliancy breaches

✓ **Reduce support costs** and **simplify upgrades**

✓ Identify unused software licences, **ensure compliancy, avoid audit penalties** from software vendors

✓ **Peace of mind** your network is secure
